

Training

Semi-Hermetic Compressors, 06C/D/E

CLASS DESCRIPTION

The goal of this course is to train field personnel to identify and correct the causes of compressor failure so that repeated failures are eliminated. The program includes: Introduction to Carlyle Compressors; models 06D and 06E familiarization and operation; reciprocating compressor failure diagnosis, teardown, and analysis; system diagnostics; procedures to prevent repeat failures. Students tear down and analyze field-returned failed compressors.

TOOL REQUIREMENTS

Attendees need to bring these tools: Allen wrenches, Ball Peen hammer, small chisel, flashlight socket sets* and ohmmeter will be needed during the teardown. An extension cord for electric impact wrench. Impact wrench is a time saver. Rags to wipe hands and parts and GoJo or other hand soap to wash hands.

Sockets sizes for 06D & 06E Compressors:

	<u>06D compressors</u>	<u>06E compressors</u>
Head Bolts	9/16"	3/4"
Bearing Head	9/16"	5/8"
Valve Backers	7/16"	7/16" + 3/8"
Suction Port	1/2" or 3/4"	3/4" or 5/16"
Rotor Bolt	15/16"	15/16"
Bottom Cover	9/16"	9/16"
