

Training Day

This training includes:

1. Key selling features. What makes this product great?
2. In-classroom installs with real control boards and thermostats for a variety of installation scenarios
3. Introduction to ecobee mobile apps and web portal
4. NATE Certified technicians will receive 2 hours of continuing education credit towards their annual recertification.
5. **No-Charge ecobee stat with attendance!** Attendee must register online in order to receive the stat. Complete the contact and cc auth sections. The credit card auth is to ensure accountability. Ecobee provides the stats for free if the recipient is willing to install and register the stat within 7 days. If you don't, ecobee won't just charge you, but will reach out to see if there were any issues and/or if the tech wishes to return the stat. Ecobee would only charge after reaching out and not getting feedback. See registration links below.
